

# FX & VFX Series International

Sealed & Vented True Sinewave Inverter/Charger

## Sealed FX

- Sinewave Output
- Intelligent Battery Charging
- Modular Stackable Design
- High Operating Efficiency
- Weather-resistant Sealed Chassis
- Field Serviceable
- Integrated Network Communications
- Standard 5 Year Warranty

## Vented VFX

- Sinewave Output
- Intelligent Battery Charging
- Modular Stackable Design
- High Operating Efficiency
- Bug Proof Chassis
- Corrosion Resistant Internal Components
- Field Serviceable
- Integrated Network Communications
- Standard 5 Year Warranty

Vented VFX

Sealed FX

OutBack Power's true sinewave inverter/charger is a complete power solution. It incorporates a DC-to-AC sinewave inverter, battery charger and an AC transfer relay housed within a die-cast aluminum chassis. Intelligent multistage battery charging reduces generator run-time and prolongs the life of your batteries. Built-in networked communications enables multiple units to be stacked and connected with other OutBack power electronics providing industry leading integration and near infinite application flexibility. The exclusive modular system architecture means that increased power output is just an additional inverter/charger away.

Our flagship FX series uses a sealed chassis that can operate in the harshest environmental conditions such as areas with high humidity, corrosive salt air, sand or dust. The VFX series uses a vented chassis with bug proof screened openings that allow high output AC power in the hottest of operating conditions.

OutBack Power Inverter/Chargers are the only choice when you need a true sinewave, powerful, modular and reliable power solution for your home, business or extreme application.
